**Federal Aviation Regulations/Aeronautical Information Manual 2013**- Federal Aviation Administration 2012-11 All the information you need to operate safely in U.S. airspace.

**In the Event of a Water Landing**-Michael G. Walling 2010 In the Event of a Water Landing At 8:15 A.M. on October 14, 1947, Chuck Martin, the 26-year-old pilot of the Boeing 314 flying boat named Bermuda Sky Queen, attempted to do what had never been done before - land an 88,000 pound aircraft in thirty-five-foot high seas. The lives of sixty-eight passengers and crew on board depended on his ability. A mile away was the 327-foot US Coast Guard Cutter George M. Bibb. The cutter's crew watched as the plane descended. If Sky Queen survived the landing, getting the passengers to safety would be their job. Nine years later and half a world away, Captain Richard Ogg, flying the Pan American Airways Stratocruiser Sovereign of the Skies, was forced ditch the aircraft along with its forty-three passengers and crew. The Coast Guard was nearby. Manning Ocean Station November was the US Coast Guard Cutter Pontchartrain. Once more, rescuing the survivors would be in their hands. In the Event of a Water Landing tells for the first time the full stories of the Bermuda Sky Queen and Sovereign of the Skies rescues, the only two completely successful open ocean ditchings in Commercial Aviation history. These two stories encompass many facets of ditchings: bad weather, engine failure, horrific sea conditions, and indomitable courage in the face of death. Between these two are tales of other ditchings as well as the journey we humans have undertaken from the beginning of transoceanic flight to today. Using the voices of passengers, flight crew, and those who rescued them, an amazing tale unfolds. Their

vivid memories, interspersed with contemporary news reports, serve to flesh out the unemotional entries from official investigations. These ditchings and rescues embody the hopes, fears, and courage of people facing death hundreds of miles from land and the audacity of the men who risked their own lives to save them.

### **Airline and Railroad Labor and Employment Law- 2010**

**Ethical Issues in Aviation**-Elizabeth Hoppe 2016-05-13 Applied ethics has been gaining wide attention in a variety of curriculums, and there is growing awareness of the need for ethical training in general. Well-publicized ethical problems such as the Challenger disaster, the Ford Pinto case and the collapse of corporations such as Enron have highlighted the need to rethink the role of ethics in the workplace. The concept of applied ethics originated in medicine with a groundbreaking book published in 1979. Business ethics books began to appear in the 1980s, with engineering ethics following in the 1990s. This volume now opens up a new area of applied ethics, comprehensively addressing the ethical issues confronting the civil aviation industry. Aviation is unique in two major ways: firstly it has a long history of government regulations, and secondly its primary focus is the safety of its passengers and crew. For decades commercial aviation was viewed in the same manner as public utilities, and thus it was highly regulated by the government. Since the Deregulation Act of 1978, aviation has been viewed as any other business while other experts continue to believe that the sudden switch to deregulation has caused problems, especially since many airlines were unprepared for the change. **Ethical Issues in Aviation** focuses on current concerns and trends, to reflect the changes that have occurred in this deregulated era. The book provides the reader with an overview of the major themes in civil aviation ethics. It

begins with theoretical frameworks, followed by sections on the business side of aviation, employee responsibility, diversity in aviation, ground issues regarding airports, air traffic control and security, as well as health and the environment. The contributors to the volume include both academics doing research in the field as well as professionals who provide accounts of the ethical situations that arise in the workplace.

**Survey of Selected Activities**-United States. Congress. House. Committee on Government Operations 1962
